W	W	w	w	<i>w</i>	Key 9 — one press	double you
X	X	x	x	<i>x</i>	Key 9 — 2 presses	ex
Y	Y	y	y	<i>y</i>	Key 9 — 3 presses	why
Z	Z	z	z	<i>z</i>	Key 9 — 4 presses	zee

Important: Email addresses do not distinguish uppercase and lowercase in this system. Uppercase and alternative shapes are shown only so you can recognize a letter printed in an advert. Enter the lowercase letter using the press count shown.

Useful symbols: On key 1: one press is dot, two presses are hyphen, three presses are underscore, four presses are plus, and five presses are digit 1. Press key 0 twice for digit 0. Press star between two letters on the same key. Press star twice to switch between letter and number modes.
Shapes worth comparing: I / l / 1, O / 0, B / 8, S / 5, G / 6, q / 9, rn / m, vv / w.

To receive this guide from the system: extension 8, then 6, then 8.
